

# Private sector involvement in water infrastructure development: an civil society perspective

by Mr.Surajit Chirawace, Senator  
Civil Society Representative from Thailand

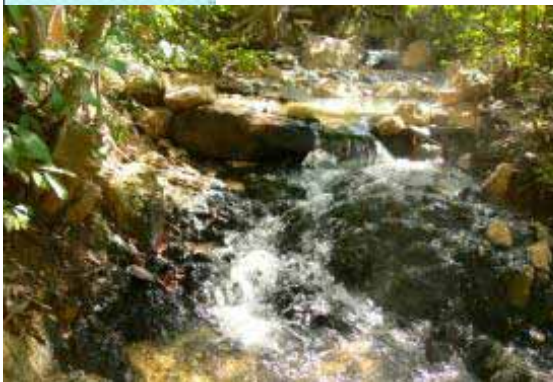

# When flood and drought become disaster?

- Adaptation of living upon seasonal change
- Flooding is benefit to farmers and fishermen
- River flow is benefit to food chain
- Increasing of chemical use in agricultural activities
- Land subsidence and coastal erosion
- Low quality of aquaculture products
- Different opinion between developers and local people

# Water Resources Development

- Irrigation development in horizontal
- Different system in upstream and downstream
- Benefit from sedimentation
- Local people understand on “Environmental Flow”
- Disaster is coming when develop by engineering guide only

# The way forward

- Develop base on geo-ecology, geo-cultural
- Develop base on livelihood
- Good governance
- Think big do small
